User Profile

Dynamic background hopefully, will definitely display username, user bio, user tags/categories, follows

Profile Photo

This same page will show to other users when they navigate to the url, but will hide private info (email, tags, edit buttons). Other users will have a follow button, and add button to recommends below

User recommends -- other users can rate user based on previous trade. Leave Comments.

Individual
request/offer page

Photo

Request/offer details. Button to email author (for working out details), button for author to change offer status (open, complete). Completed requests allow no edits, but status can be changed back to open.

Profile box for author with photo,
follow button if not user.
